

Secondary SDG Impact

With this chart we can see how our relevant issues contribute to achieving the SDGs indirectly: secondary impact.

SECONDARY SDG IMPACT

USEFUL SUGGESTIONS

- If you want to print this document it is in A4 format.
- Use Microsoft Office Excel to do the plot.
- We recommend using a bar chart to make it easy to identify the information

The chart, step by step

1. During the *Step 02 Defining priorities* materiality analysis, the person in charge of heritage management will get to know how their relevant issues impact on the SDGs, taking into account that there is a main impact and a secondary one. To do so, an assessment is made of our issues with the SDGs and the repercussion that each one has is defined.

2. As we know, when implementing a strategy in a specific SDG this has an effect on other SDGs, with these being the secondary SDGs.
3. To do so, a spreadsheet is created with a column for the dimensions (5 Ps), a second column showing the 17 SDGs classified by their corresponding dimension, the third and fourth columns are used to set out which materiality issues impact on a specific SDG - one for the main SDG and another for the secondary SDG.

NOTE

the program used to create this file was Microsoft Excel 365. In addition, it should be taken into account that the format printed in the guide was created by a design agency and each entity will have a different view point and decide on their own format. At the same time, the values and data obtained may be different from the example provided as a source of inspiration.

4. A count is made of how many times a specific SDG is repeated in order to fill in the main and secondary SDG impact columns with figures¹.

DIMENSION	SDG	NO. MAIN SDG IMPACTS	NO. SECONDARY SDG IMPACTS
PEOPLE	SDG 1	0	1
	SDG 2	0	0
	SDG 3	1	9
	SDG 4	2	1
	SDG 5	0	3
PLANET	SDG 6	1	2
	SDG 12	3	11
	SDG 13	1	13
	SDG 14	0	4
	SDG 15	2	8
PROSPERITY	SDG 7	0	3
	SDG 8	3	9
	SDG 9	0	8
	SDG 10	0	10
	SDG 11	5	14
PEACE	SDG 16	2	4
PARTNERSHIP	SDG 17	1	5

5. Next, we select the menu bar options “Insert + Chart + Bar chart”. This step is made twice, once to get the main SDG bar charts, and another for the secondary SDG. However, the data for both of them can be combined in a single chart. This would be decided by the person in charge of managing the heritage resource.

1. This can be added up with the “=COUNTIF” function/formula
